\*Please note: PPCS is now known as Silver Fern Farms Limited

Mineral**Check** trace element monitoring is a strategic management tool that can help you maximise production and minimise expenditure by identifying the trace element status of your animals. While information can be obtained by blood sampling and liver biopsies taken from live animals, liver sampling is an effective and convenient method when animals go to the meat works. The liver sampling is available through all the meat works and the service also includes a visual assessment of the livers for liver fluke, liver eczema and abscesses

Procedure:

- Please fill out the front side of this form and give it to the stock truck driver to deliver to the meat works with your declaration card/trucking documents.
- Please ensure a copy is faxed to AsureQuality at the meat work premises well before you send the stock
